DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest a method for estimating a thickness of a wall of a lumen from an image of a lumen which includes identification of both and inner and outer contour, performing triangulation to define triangles between the inner and outer contour, adding additional triangles defined using a minimal energy function to identify edges that correspond to a width between the inner and outer contour, comparing triangle edges to identify a minimum and maximum width from the comparison.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1-44 are allowed.
